

Attorney Docket No. 2006\_1221A  
Serial No. 10/587,859  
June 29, 2007

**AMENDMENTS TO THE DRAWINGS**

*Attached are new Figures 1-8 as separate drawings.*

**REMARKS**

The specification has been amended along the lines done in parent application Serial No. 10/766,480, now US Patent No. 7,148,192.

Specifically, the specification has been amended to conform with the general outline of patent specifications by including appropriate section headings, including a Brief Description of the Drawings.

The specification has been amended to include the updated continuation data on page 1.

The specification has been amended to include appropriate sequence identifiers (SEQ ID NOS) for the disclosed sequences throughout as required by US practice.

An abstract has been added to the specification as supported by the original disclosure at page 1, lines 17-22.

The embedded figures at pages 11, 12, 18, 19, 21 and 23 of the disclosure have been removed from the body of the specification and added back as separate figures in accordance with US practice. Accordingly, attached are new Figures 1-8 as separate drawings, which correspond to the figures embedded in the specification at pages 11, 12, 18, 19, 21 and 23.

No new matter has been added by the above amendments.

Favorable action on the merits is solicited.

Respectfully submitted,

Herbert MOESSLER et al.

By: 

Jay E. Williams
